BEST MIM

WHAT'S YOUR STORY

Rohan graduated with a Bachelor's degree in engineering from a reputable Indian college and entered the job market with high hopes. *His first job offered ₹5 LPA, a common entry-level salary, but high living expenses in an Indian metro city quickly ate into his income. He worked long hours, often 50-hour weeks, which affected his work-life balance. After five years, his progress was slower than expected, with his salary rising to ₹10 LPA. Promotions were slow, and he remained in mid-level positions with limited international exposure. Switching industries with just a Bachelor's degree was difficult, and he often considered further education to boost his prospects. He envied peers working abroad with seemingly better work-life balance.*

After completing her Bachelor's, Shreya pursued a Master's in Data Science in India, a booming field. *Her two-year investment paid off with a job starting at ₹12 LPA. Within three years, she was earning ₹18 LPA and moved into a managerial role at an MNC in Bangalore. Although her salary and work environment improved, long hours and a rigid hierarchy remained. Her job offered some exposure to global trends, but opportunities to work abroad were limited. Despite a better salary but poor work-life balance, city challenges like traffic and pollution affected her quality of life, and switching industries seemed difficult.*

After his Bachelor's, Pavan pursued a Master's in Artificial Intelligence from a top German university, supported by his family and some education loan despite the high costs. *He quickly secured a job at a major tech firm with a starting salary of \$80,000 (₹66 LPA), much higher than Rohan's or Shreya's. His role offered extensive international exposure and rapid career growth, leading to a salary of \$120,000 (₹99 LPA) within three years and a leadership position. Pavan enjoyed a high quality of life, with excellent infrastructure, work-life balance, and career flexibility. He could easily switch industries or countries, and Germany's visa programs offered him a pathway to permanent residency. Reflecting on his decision, Pavan felt it had provided him global opportunities and financial stability that would have been harder to achieve in India.*

AFFORDABLE PRICING

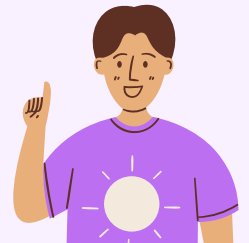

“I want to pursue a top **Master's abroad** for a better lifestyle, but I don't need expert guidance.”

“Getting into top Master's programs is **highly competitive**, and without expert guidance, you're at a **disadvantage.**”

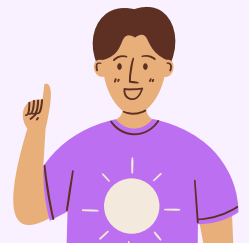

“Why would I need experts when I can use **AI tools** like ChatGPT to write my essays, LORs, and CVs? or reach out to some **alumni on LinkedIn** for help”

“Admission Committees have top class **ANTI-AI Tools** to combat non-human made content so your application will be **rejected in the first step** itself and the Alumni are busy, not giving you undivided attention to your application”

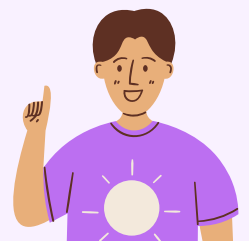

“I get it—where I do my Master's is crucial for my **career and life**, but expert help must be expensive, right?”

“No actually it's the other way around. Best MIM is India's **most affordable expertise** in Admissions Consulting!”

“Actually, your prices are **students-friendly** and better than other consultancies. But doesn't that mean your services might not be top-notch?”

“Our track record speaks for itself—comprehensive support from GMAT/GRE prep to essays and LORs, with **international consultants and personal assistance** with **exclusive consultant** per candidate, all **under 50,000 INR!**”
